

Lipoderma®

Restore What's Yours

As a first-of-its-kind, like-for-like **structural fat filler**, Lipoderma restores “good fat” with “good fat”. It rebuilds the foundation beneath the skin to support a natural, youthful-looking appearance and seamlessly integrates with the body’s own tissue.

Available in 1.5 and 10cc units

Native Adipose Tissue

Lipoderma

H&E-stained human adipose tissue samples at 20x magnification

The Only Adipose Allograft that Retains Key Structural & Biological Components

- Intact adipocytes
- Extracellular matrix
- Signaling molecules

Manufactured for Safety and Consistency

- Manufactured in partnership with LifeLink Tissue Bank, in compliance with all applicable FDA regulations and AATB standards
- Tissue is recovered from eligible donors, tested per 21 CFR 1271, and processed aseptically (non-irradiated) using Britecyte's proprietary, patent pending method
- Final sterility testing is performed in accordance with USP <71> guidelines

Backed by Peer-Reviewed Data*

- Allografts remain in place and do not resorb
- Allografts integrate with host tissue
- New blood vessel formation as early as 3 days

Visual appearance of Lipoderma at different time points after subcutaneous implantation in rats
